

*Located on the campus of Clara Maass Medical Center*

COMING SOON

# We're improving our service to you.

On **August 1, 2015** Progressive Imaging of Belleville will be replacing our Electronic Medical Record system allowing us to provide better service to both you and your patients. This new, meaningful use certified system will become the backbone of future tools providing you better access to information about the radiologic care of your patients.

If you access images through our portal, we will be introducing a new portal called **CONNECT** that will replace the portal you are using today. Your marketing representative will provide you more information before any changes are made to your online access.

## We ask for your patience during this transition.

While we hope that our change is seamless to you, it could take several days to get back to our current report turnaround time.

If you experience any issues or any concerns during this time, please contact your service representative. We care about providing the highest quality service to you and your patients.

Thank you,  
Progressive Imaging of Belleville
